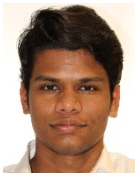
VARUN SINGH



SOFTWARE DEVELOPER

Master's student in IT with hands-on experience shipping AI-powered and full-stack applications to production. From architecting RAG-based compliance platforms to publishing Chrome Extensions, I deliver measurable results—boosting engagement 25%, cutting manual effort 80%, and leading a hackathon-winning team. Adept at building scalable backend systems, crafting responsive frontends, and implementing secure authentication pipelines across diverse tech stacks.

KEY PROJECTS

CompliGen – AI Compliance Doc Generator

Django REST • PostgreSQL • LangChain • Vertex AI • ChromaDB • JWT

GitHub Repository

- Architected a RAG-powered platform that auto-generates Privacy Policies, Terms of Service, and Acceptable Use Policies in seconds, reducing manual legal drafting by ~80%.
- Engineered secure JWT workflows and structured REST APIs to transform business inputs into export-ready legal documents with PDF/DOCX export functionality.
- Designed scalable document generation pipelines supporting multiple business types and compliance frameworks.

SmartRecipe – AI Recipe Generator LIVE

Django REST • React • Vite • LangChain • Gemini API • PostgreSQL

Live Demo

- Shipped a full-stack AI app converting available ingredients into personalized recipes with optional nutritional insights—deployed live on Vercel.
- Built responsive mobile-first UI with secure authentication, achieving sub-2-second generation response times.
- Integrated LangChain with Gemini API for context-aware recipe generation across dietary preferences.

WebNotes – Chrome Extension PUBLISHED

JavaScript • Chrome Manifest V3 • HTML • CSS

Chrome Web Store | GitHub

- Published a productivity extension on the Chrome Web Store for instant text capture, organization, and export from any webpage—eliminating manual copy-paste workflows.
- Engineered lightweight architecture with local storage for instant retrieval, optimized for researchers and students.

PROFESSIONAL EXPERIENCE

Software Developer Intern

Nov 2023 – Feb 2024

Hydrizon Pty Ltd, Sydney

- Developed and launched a WordPress company website, increasing online visibility and user engagement by 25%.
- Customized website functionality using PHP to meet business requirements, reducing manual content updates by 30%..
- Redesigned page layouts and visual branding elements, improving UX and lowering bounce rate by 15%.
- Collaborated with cross-functional stakeholders to gather requirements, accelerating project approval cycles by 20%.

Medical Receptionist (Part-Time)

Aug 2022 – Jan 2025

Urgent Care Brisbane, Indooroopilly

- Processed 200+ medical insurance claims weekly with 99% compliance accuracy in a fast-paced healthcare setting.
- Streamlined appointment scheduling workflows, reducing average patient wait times by 15%.
- Managed multi-line phone systems and coordinated with medical staff to maintain smooth front-desk operations.

CORE STRENGTHS

Cross-functional Collaboration • Technical Leadership • Problem-Solving • Agile Delivery • Rapid Prototyping • API Design • User-Centric Design • Database Optimization • Secure Authentication

SKILLS

Languages

Python JavaScript Java C SQL

Frontend

React Vite Tailwind Bootstrap HTML5 CSS3 Streamlit

Backend & APIs

Django REST Flask Supabase PostgreSQL

AI / ML

LangChain RAG Vertex AI Gemini ChromaDB

DevOps & Tools

Git Postman Jira Agile/Scrum

Security

Wireshark Kali Linux JWT Auth Networking

EDUCATION

Master of IT

Software Development

University of Tasmania

Jul 2025 – Present

BSc Computer Science

Cybersecurity – UQ

University of Queensland

Jul 2022 – Jun 2025

ACHIEVEMENT

★ Best People's Choice

UQCS Hackathon 2024

Led 6-member team to victory with Valostats – ML esports predictor. Competed against 30+ teams.
